

Hi!
My Name is
Katherine
and I build things for the web.

PORTFOLIO

SERVICES

As a Front End Developer, I offer comprehensive web design and development services, specializing in creating responsive, user-friendly websites and web applications. My expertise includes developing with the latest front-end technologies like HTML5, CSS3, JavaScript, and popular frameworks like React and Vue.js. I focus on crafting seamless user experiences, ensuring cross-browser compatibility, and implementing modern design principles for optimal user engagement. Additionally, I offer maintenance and optimization services to keep websites up-to-date and performing efficiently.

RESPONSIVE WEBSITE DEVELOPMENT

Creation of visually appealing and user-friendly websites that are optimized for performance across all devices, including desktops, tablets, and smartphones. Utilizing the latest HTML, CSS, and JavaScript techniques, I ensure that your website provides a seamless user experience regardless of the device used.

UI/UX DESIGN CONSULTATION

Offering expert advice and solutions on user interface and user experience design. This includes wireframing, prototyping, and designing interactive elements that enhance user engagement and satisfaction. My approach is user-centered, focusing on creating intuitive and accessible interfaces that align with your business objectives.

FRONT-END PERFORMANCE OPTIMIZATION

Improving website speed and efficiency through front-end optimization techniques. This includes code minification, image optimization, efficient loading of scripts, and leveraging browser caching. I focus on enhancing the end-user experience by reducing load times and improving the overall responsiveness of your website.

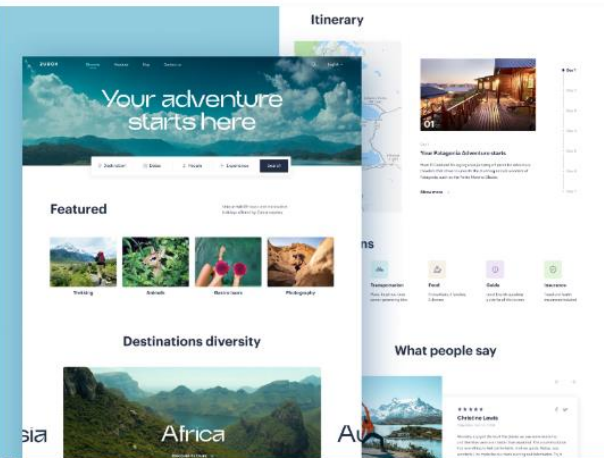

WEB ACCESSIBILITY COMPLIANCE

Ensuring your website meets current web accessibility standards, making it accessible to all users, including those with disabilities. I implement practices compliant with WCAG (Web Content Accessibility Guidelines) to enhance your site's accessibility through keyboard navigation, screen reader support, and proper semantic HTML structure.

RECENT PROJECTS

EcoTravel Planner

A web application designed for eco-friendly travel enthusiasts. It features an interactive map, carbon footprint calculator, and personalized green travel itineraries. This project showcases advanced JavaScript skills, API integration, and responsive design using Bootstrap.

ArtGallery Online

An online platform for artists to showcase and sell their work. This project involved creating a visually appealing and user-friendly interface, with features like high-resolution image galleries, artist profiles, and e-commerce functionality. Developed using React.js and integrated with a CMS for easy content management.

ABOUT ME

Front End Developer

Hello! I'm **Katherine**, a passionate Front End Developer with a flair for creating engaging and user-friendly digital experiences. With a background in computer science and a deep love for web design, I've dedicated my career to the art and science of website development.

My journey began at PHINMA University of Pangasinan - Dagupan, where I honed my skills in HTML, CSS, and JavaScript. Since then, I've embraced the rapid evolution of front-end technologies, mastering frameworks like React and Vue.js to bring dynamic, responsive, and visually appealing interfaces to life.

In my current role at ABC Tech, I collaborate with cross-functional teams, translating design concepts into functional website features. I pride myself on my meticulous attention to detail and my commitment to writing clean, efficient, and accessible code.

When I'm not coding, I love contributing to open-source projects, staying ahead of the latest industry trends, and sharing my knowledge with budding developers at local meetups and tech conferences. I'm always excited about new challenges and opportunities to push the boundaries of what's possible on the web. Let's connect and create something amazing together!
